

Finding Homes

Powering the Region's Real Estate Industry
NORTHWEST
MULTIPLE LISTING SERVICE®

Start Your Home Search with Just Your Voice

Finding Homes is a hands-free, bilingual home search experience available on Amazon Alexa—brought to you by Northwest Multiple Listing Service and Lundy, Inc.

Designed with accessibility in mind, it lets you explore NWMLS listings using simple voice commands—no clicks, drop-downs, or filters required. Finding Homes makes it easy and intuitive to search for properties that match your needs, whether you're visually impaired, multitasking, or just prefer using your voice.

You can use Finding Homes on any Alexa-enabled device, including Echo speakers, Echo Show screens, Amazon Fire TV, or the Alexa app* on your phone.

Start speaking, try prompts such as:

"Search in Kirkland, WA" or "Find homes in 98034"

Refine your search:

**"Show me the homes that have a basement"
or "Remove homes without garages"**

Just say:

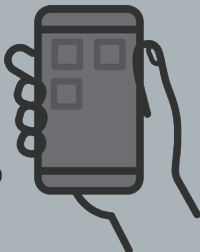

**"Alexa, start
Finding Homes"**
